

Exciting NEWS for 2026

We're pleased to share that **ACRO Manufacturing Industries Ltd. has expanded our production capacity** with the addition of a **new ATOM FLASHCUT 222 L12 digital cutting system**.

This investment enables **faster lead times, increased precision, and improved repeatability** for both custom and production gasket programs—particularly where complex profiles and tight tolerances are required.

As a **family-owned business established in 1948**, ACRO combines advanced manufacturing technology with decades of hands-on expertise to deliver reliable, responsive sealing solutions.

What this means for you:

- Faster turnaround on custom and repeat orders
- Greater accuracy on complex gasket designs
- Expanded cutting capability up to **25 mm (1") thick**
- Higher-volume capacity with consistent results
- Seamless **DXF / AutoCAD** file integration

FLASHCUT 222 L12

Digital Cutting System for Precision Gasket Fabrication

Technical Specifications

- **Maximum Cutting Area:** 1200 × 1000 mm (48" × 40")
- **Maximum Material Thickness:** Up to 25 mm (1.0")

Combined with our **extensive in-house material inventory**, **ISO 9001:2015 QMS certification**, and **over 75 years of experience**, this expansion further strengthens ACRO's role as a dependable, long-term sealing partner.
